

## UNINN Infinity Project, Coventry

**Materials Supplied:**

8,000m<sup>2</sup> 8mm Equitone Tectiva in Hessian & Pebble Grey

**Fixing System:**

TUF-S Secret Fix

**Main Contractor:**

Winvic

**The Project:**

In total, approximately 8,000m<sup>2</sup> of Equitone fibre cement cladding is being used on the project; 6,500m<sup>2</sup> of pebble grey and hessian in a mix of flat and linea and 1,500m<sup>2</sup> of the Tectiva board in linen. "Given the fact that the building comprises 19 storeys, this is one of the most significant uses of fibre cement rainscreen cladding we've seen in recent years," comments Chris Meyerhoff of cladding supplier Vivalda Group. "This project really demonstrates that when properly specified, rainscreen cladding can surpass all safety regulations and look fantastic too!"
