Introduction

- Rock mineral fibre insulation with a thermal conductivity of 0.036 W/mK
- A1 Euroclass
- 610 mm wide slabs fit neatly between studs at 600 mm centres

Product details

Typical construction

The product

Kingspan K-Roc® Framing Slab is a rock mineral fibre insulation.

Standard dimensions

Kingspan K-Roc® Framing Slab is available in the following standard size(s):

Nominal dimension		Availability
Length	(m)	1.22
Width	(m)	0.61
Insulant thickness	(mm)	100, 150

Moisture properties

Kingspan K-Roc® Framing Slab typically achieves a water vapour resistivity of 5 MNs/gm and a water vapour diffusion resistance factor of 1 MU, μ in accordance with BS EN 12086: 2013 (Thermal insulating products for building applications. Determination of water vapour transmission properties).

Kingspan K-Roc® Framing Slab typically achieves a water absorption (short term) of $\leq 1 \text{ kg/m}^2$ when tested to BS EN ISO 29767: 2019 (Thermal insulating products for building applications. Determination of short term water absorption by partial immersion).

Kingspan K-Roc® Framing Slab typically achieves a water absorption (long term) of $\leq 3 \text{ kg/m}^2$ when tested to EN 12087: 2013 (Thermal insulating products for building applications. Determination of long term water absorption by immersion).

Density

Kingspan K-Roc® Framing Slab has a density of 28 - 32 kg/m³.

Thermal properties

The λ -values and R-values detailed below are quoted in accordance with BS EN 13162: 2012 + A1: 2015 (Thermal insulation products for buildings. Factory made mineral wool (MW) products. Specification).

Thermal conductivity

The slabs achieve a thermal conductivity (λ -value) of: 0.036 W/mK.

Thermal resistance

Thermal resistance (R-value) varies with thickness and is calculated by dividing the thickness of the slab (expressed in metres) by its thermal conductivity. The resulting number is rounded down to the nearest 0.05 (m²K/W).

Insulant thickness (mm)	Thermal resistance (m ² K/W)
100	2.75
150	4.15

U-values

Rainscreen façade systems are proprietary, resulting in a wide variation of possible system build-ups, material combinations and mechanisms that are used to fix and support the external cladding to the wall structure. It is advised that the Kingspan Insulation Technical Service Department is contacted for specific U-value calculations (see rear cover for details).

Design considerations

Responsible sourcing

Kingspan K-Roc® Framing Slab is manufactured under a management system certified to ISO 14001: 2015 (Environmental management systems).

NB The above information is correct at the time of writing. Please contact the Kingspan Insulation Technical Service team (see rear cover for details) for copies of certificates.

Specification clause

Kingspan K-Roc® Framing Slab should be described in specifications as: The wall insulation shall be Kingspan K-Roc® Framing Slab _____ mm thick: comprising a rock mineral fibre insulation. The product shall be manufactured under a management system certified to ISO 9001: 2015 and ISO 14001: 2015.

Fire stops & cavity barrier strategy

Current guidance to the Building Regulations should be considered with regard to the performance requirements for, and the provision of fire stops and cavity barriers.

Reference should also be made to 'Structural Timber Buildings Fire Safety in Use Guidance Volume 2 - Cavity Barriers and Fire Stopping' by the Structural Timber Association.

Fire safety

For guidance regarding the routes to compliance for meeting the fire safety requirements of the Building Regulations / Standards, refer to www.kingspaninsulation.co.uk/fireregulations (for GB) or contact technical services at technical@kingspaninsulation.ie (for Ireland).

Fire performance

Under System 1 AVCP, Kingspan K-Roc® Framing Slab achieves European Classification (Euroclass) A1 when classified to EN 13501-1: 2018 (Fire classification of construction products and building elements - Classification using data from reaction to fire tests). The UK Certificate of Constancy of Performance (certificate number 0836-CPR-22/P6091) and EU Certificate of Constancy of Performance (certificate number 0809-CPR-19000635) are available to download on the [website](#).

Kingspan K-Roc® Framing Slab (used in conjunction with Kingspan K-Roc® Rainscreen Slab) in the constructions specified in the following table, when subjected to BS EN 1364-1: 2015 (Fire resistance tests for non-loadbearing elements - Walls) achieved the results shown.

Test	BS EN 1364-1: 2015	
Build-up	1*	2**
Report no.	EUI-21-B-000335-A - Revision 1	EUI-21-B-000335-B
Issue date	21 April 2022	21 April 2022
Direction	Inside to outside	Outside to inside
Integrity (mins.)	112	132

When classified under BS EN 13501-2: 2016 (Fire classification of construction products and buildings elements - Classification using data from fire resistance tests, excluding ventilation services), Kingspan K-Roc® Framing Slab (used in conjunction with Kingspan K-Roc® Rainscreen Slab), in the constructions specified below, has achieved the fire classifications shown.

Classification	BS EN 13501-2: 2016	
Build-up	1*	2**
Report no.	EUI-21-000335	
Issue date	9 May 2022	
Direction	Inside to outside	Outside to inside
Integrity (mins.)	EI 90	EI 120

* Build-up 1 - 2 x 15 mm layers of Fireline plasterboard, VCL, 100 mm **Kingspan K-Roc® Framing Slab** between metal studs @600tc (Kingspan Steel Framing System), 12 mm Y-wall sheathing board, Kingspan nilvent® and 100 mm **Kingspan K-Roc® Rainscreen Slab**.

** Build-up 2 - 100 mm **Kingspan K-Roc® Rainscreen Slab**, Kingspan nilvent®, 12 mm Y-wall sheathing board, 100 mm **Kingspan K-Roc® Framing Slab** between metal studs @600tc (Kingspan Steel Framing System), VCL and 2 x 15 mm layers of Fireline plasterboard.

Sitework

General

Cutting

- The use of dust masks is recommended, in accordance with CDM Guidelines, to prevent inhalation in the event loose fibres become airborne during the process of cutting.
- Cutting should be carried out using a hard steel bladed saw.
- Ensure accurate trimming to achieve close butting joints and continuity of insulation.

Daily working practice

- At the completion of each day's work, or whenever work is interrupted for extended periods of time, slab edges and joints should be protected from inclement weather.

Availability

- Kingspan K-Roc® Framing Slab is available through specialist insulation distributors and selected builders' merchants throughout Great Britain and Ireland.

Packaging & storage

- The polyethylene packaging of Kingspan Insulation products, which is recyclable, should not be considered adequate for outdoor protection.
- Ideally, slabs should be stored inside a building. If, however, outside storage cannot be avoided, then the slabs should be stacked clear of the ground and covered with an opaque polythene sheet or weatherproof tarpaulin. Slabs that have been allowed to get wet should not be used.

About Kingspan Insulation

Products & solutions

Rigid insulation products for building fabric applications, including roofs, walls and floors.

- Kingspan AlphaCore® – microporous silica-based insulation.
- Kingspan OPTIM-R® – vacuum insulation panel (VIP) systems.
- Kingspan Kooltherm® – phenolic insulation.
- Kingspan Therma™ – PIR insulation.
- Kingspan K-Roc® – rock mineral fibre insulation.
- Kingspan GreenGuard® – extruded polystyrene insulation (XPS).
- Kingspan TEK® – structural insulated panels (SIPs).
- Cavity closers – PVC-U extrusions with an insulation core.
- Membranes – for pitched roofs and walls.

About Kingspan Insulation

From new housing developments to refurbishing your home, we offer a number of different solutions for roof, wall and floor applications.

Insulation for tiled or slated pitched warm roof spaces

Insulated extrusions for closing wall cavities at openings

Full and partial fill cavity wall insulation

About Kingspan Insulation

About Kingspan Insulation

Solutions available for roofs, walls and floors of commercial buildings, from schools to retail.

Insulation for use behind rainscreen or masonry façade systems

External insulation for masonry walls

Insulation for structural ceilings (soffits)

About Kingspan Insulation

Company details

Kingspan Insulation Ltd is part of the Kingspan Group plc., one of Europe's leading construction product manufacturers. The Kingspan Group was formed in the late 1960s and is a publicly quoted group of companies headquartered in Kingscourt, County Cavan, Ireland.

Kingspan Insulation Ltd is a leading manufacturer of rigid insulation products and insulated systems for building fabric and building services applications.

Our GB head office is located in Pembridge, in the heart of rural Herefordshire. Our northern hub is near Selby in North Yorkshire. We also have a site in Castleblayney, Ireland. All three sites are accredited to the independent compliance standard ISO 37301: 2021.

Services

Our support services provide fast and accurate advice no matter what your role is. Visit our website to access the following services.

- U-value calculations – free, quick and easy U-value calculations with our U-value Calculator.
- Help and advice on your projects, including stockists, how to guides, regulatory guidance and e-learning.
- Dedicated Specification and Sales teams to support projects.
- Building Information Modelling (BIM) – download BIM objects for our products.
- Tapered roofing service – Kingspan Insulation's tapered roofing systems come with a supporting design service to ensure the most cost-effective solution for a roof is identified.

- CPDs – Kingspan Insulation offers a number of free CPD seminars for architects and specifiers covering a wide range of industry topics. CPDs can be booked or a range of courses can be found online.
- Product awareness training – build your team's knowledge with on-site training and support with one of our experienced product technicians who cover the full range of Kingspan products and applications, from flooring to roofing and everything in-between with both internal and external wall insulations.

Planet Passionate is our group wide global sustainability programme.

Our Planet Passionate programme aims to have a positive impact on three big global challenges: climate change, circularity and protection of our natural world.

Scan for our latest progress report to learn more about our targets, partnerships and global commitments.
