

vintage, anthracite, matt

size
comparison

Products: concrete skin, öko skin, formparts sharp edge

Width: max. 1310 mm

Length: max. 5000 mm

Thickness: 13 mm

Weight: ~ 30 kg/m²

Fastening: rivets, screws (on wooden supporting structure)*, adhesive, undercut anchor, öko skin hidden fix (only for öko skin), plug & play (only for formparts)

Colours: anthracite, liquid black, terra, walnut, ebony, oxide red, burgundy, merlot

Surface: matt

Price: €€€

Scale 1:1

The natural imperfection and visual irregularity of the vintage panels give the facade a unique appearance and above all individuality, since no slab is like any other.

* For visible attachment using screws on a wooden supporting structure, no approval is available. The relevant country-specific regulations must be adhered to. Additionally, the technical foundations for the attachment must be followed.

slate, anthracite, ferro soft

size comparison

Product: concrete skin
Width: max. 1510 mm
Length: max. 5000 mm

Thickness: 13 + 2 mm
Weight: 30 - 35 kg/m²
Fastening: undercut anchor recommended

Colour collections: greyscale, pietra, timber, bricky

Surface: ferro soft

Price: €€€

Scale 1:1

The appearance of the texture is based on slate slabs and their natural layers. A unique light refraction occurs at the edges of the rock layers, causing them to stand out to varying degrees depending on the angle the light hits. Since light conditions change over the course of the day, the facade with this texture has a different appearance depending on the time of day. This gives the building a vibrant and natural look. Like an image of nature, the facade blends harmoniously into its surroundings.

lumber, terra, ferro

size comparison

Product: concrete skin
Width: max. 1510 mm
Length: max. 5000 mm

Thickness: 13 + 3 mm
Weight: ~ 35 kg/m²
Fixing: undercut anchor recommended

Colour collections: greyscale, pietra, timber, bricky

Surface: ferro

Price: €€€

Scale 1:1

lumber is based on an authentic natural look. A homogeneous wood grain lends the building envelope a strong depth effect. Similar to wood, the facade panels have a multi-layered effect, but unlike wood, they do not require additional weather protection.

The alignment of the texture lines runs from bottom to top when a format plate is aligned vertically and from left to right when it is aligned horizontally.

glossy, silvergrey, solo

size comparison

Product: concrete skin - interior only!

Width: max. 1510 mm

Length: max. 5000 mm

Thickness: 13 mm

Weight: ~ 30 kg/m²

Fastening: rivets, screws (on wooden supporting structure)*, adhesive, undercut anchor

Colour collections: greyscale, pietra, timber, bricky

Surface: solo

Price: €€€

Scale 1:1

The exquisite texture is an interior highlight and an elegant eye-catcher. The shiny surface reflects the light and creates a new space effect. The slabs have a different look depending on how the light falls. This texture particularly emphasises the vivid surface characteristic of concrete with its interplay of colour shades and cloud effects. The natural appearance of the material changes over time, giving each panel a unique look.

* For visible attachment using screws on a wooden supporting structure, no approval is available. The relevant country-specific regulations must be adhered to. Additionally, the technical foundations for the attachment must be followed.

groove ■

groove, silvergrey, ferro light

size comparison

Products: concrete skin, formparts sharp edges

Width: max. 1510 mm

Length: max. 5000 mm

Thickness: 13 + 2 mm

Weight: 30 - 35 kg/m²

Fastening: undercut anchor recommended

Colour collections: greyscale, pietra, timber, bricky

Surface: ferro light, ferro soft

Price: €€€

Scale 1:1

Accentuated lines in three different finishes ferro soft, ferro light and ferro create a lively relief and set exciting highlights on every facade.

The alignment of the texture lines runs from bottom to top when a format plate is aligned vertically and from left to right when it is aligned horizontally.

twine, chrome, ferro

size comparison

Product: concrete skin
Width: max. 1510 mm
Length: max. 5000 mm

Thickness: 13 + 2 mm
Weight: 30 - 35 kg/m²
Fastening: undercut anchor recommended

Colour collections: greyscale, pietra, timber, bricky

Surface: ferro light, ferro, ferro soft

Price: €€€

Scale 1:1

Irregular lines playfully run across the slabs like ribbons. The combination of straight and angled, partially overlapping lines of different sizes creates an exciting visual effect on the facade. The flow of the lines harmoniously integrates into the overall picture.

The alignment of the texture lines runs from bottom to top when a format plate is aligned vertically and from left to right when it is aligned horizontally.

luce silver ■

luce silver, liquid black, ferro

size comparison

Products: concrete skin, formparts round and sharp edges

Width: max. 1510 mm

Length: max. 5000 mm

Thickness: 13 mm

Weight: ~ 30 kg/m²

Fastening: rivets, screws (on wooden supporting structure)*, adhesive, undercut anchor, plug & play (only for formparts)

Colours: polar white, silvergrey, anthracite, liquid black

Surface: ferro

Price: €€€

Scale 1:1

The addition of mica gives the facade a glittering, shimmering appearance. Depending on how the sunlight falls, the particles reflect in different ways and create unique effects. This is definitely the texture for individual highlights.

* For visible attachment using screws on a wooden supporting structure, no approval is available. The relevant country-specific regulations must be adhered to. Additionally, the technical foundations for the attachment must be followed.

terrazzo black ■

terrazzo black, polar white, ferro plus

size
comparison

Products: concrete skin, formparts sharp edges

Width: max. 1310 mm

Length: max. 5000 mm

Thickness: 13 mm

Weight: ~ 30 kg/m²

Fastening: rivets, screws (on wooden supporting structure)*, adhesive, undercut anchor, plug & play (only for formparts)

Colours: polar white, off-white, ivory, silvergrey, sandstone

Surface: ferro plus

Price: €€€

Scale 1:1

The coarse, dark grain gives this slab a individual look. A special surface treatment lends the texture a unique speckled appearance, which forms an exciting contrast, especially with light colours. terrazzo black gives the facade a discreet two-tone effect.

* For visible attachment using screws on a wooden supporting structure, no approval is available. The relevant country-specific regulations must be adhered to. Additionally, the technical foundations for the attachment must be followed.
