

The Future of Cement Board

SECOLITE® Cement Board is a lightweight board made of Portland cement, aggregates and other materials, reinforced on both sides with embedded glass fibre.

SECOLITE® Cement Board is ideal for use in demanding environments. It can be used in both indoor and outdoor applications.

Water resistant
Weather resistant
up to 12 months

Impact resistant
Mold resistant

Non-combustible
according to EN13501-1
Excellent fire resistance

**Easy to cut, handle
and install**
Dimensionally stable

Main advantages:

- A1 Non-combustible according to EN13501-1
- Simply score and snap
- Water resistant
- Mould resistant
- Weather-proof and durable
- Impact resistant and dimensionally stable
- Rot resistant
- Easy to handle and install comparable to Gypsum plasterboard

We stock all SECOLITE® Cement Boards & complementary products.

SECOLITE® Cement Board is ideal for use in demanding environments. The board offers a dry, stable base for directly applied renders, and can be used behind rainscreen cladding systems. SECOLITE® is a strong, lightweight, moisture-resistant building material, reinforced on both sides with embedded glass fibre. It is available in a variety of thicknesses and sizes and is perfect for a wide range of internal and external building applications.
